

Adam Pangelinan

FRONTEND SOFTWARE ENGINEER | REACT, TYPESCRIPT, ASYNC SYSTEMS

adamtpang@gmail.com | +60 19 798 1734 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Malaysia | US citizen | No US sponsorship required | Open to New York relocation

Frontend-leaning TypeScript engineer with 2 to 3 years of experience shipping user-facing products. Builds React interfaces around asynchronous state, API integrations, typed validation, automated tests, and explicit failure boundaries.

SELECTED ENGINEERING WORK

- **skill.supply | React product with live data** | Built and deployed a Next.js 16 product from an empty repository in under two weeks, with structured Anthropic outputs, Zod validation, streamed run state, and live job inventory from 4 ATS APIs plus 6 aggregators.
- **summon.company | Agent reliability evaluation** | Extended a Paperclip-derived agent-company system with truth reconciliation and an end-to-end evaluation. The real pipeline classified 12/12 known scenarios across five statuses with zero false auto-closes in 2 security or payment cases.
- **Quantus miner | Production systems debugging** | Root-caused a Windows wgpu OOM to duplicate backend enumeration and a CPU-emulated adapter. A maintainer verified the diagnosis, reviewed the proposed fix, and shipped a corrected upstream adapter-selection implementation.
- **IDI Guam | Client product delivery** | Rebuilt a wholesale distributor's customer site in Next.js and TypeScript, centralizing operational facts in typed data and adding structured metadata, account inquiry, analytics, and explicit form-delivery states.

EXPERIENCE

Anchor Marianas | Founder and Software Engineer | Oct 2024 to present | Remote

Sold and delivered software directly to clients, carrying work from discovery through implementation and production handoff.

EIGN | Software Engineer and B2B Sales | One-month trial, ended Dec 2025 | Remote

Built Lightmark.app's evidence-backed website diagnostic and worked across engineering, technical discovery, product demos, and outbound sales.

Guam Power Authority | Workflow Automation | 2024 | Guam

Automated a legacy Excel workflow from approximately 2 hours per run to approximately 2 minutes.

SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, HTML, CSS, responsive UI, state management

Data and integration: REST APIs, streamed state, structured outputs, Zod validation, live data, Python

Quality and delivery: accessibility, performance, debugging, documentation, Playwright, Vitest, pytest

EDUCATION

App Academy | Full-Stack Web Development | 2022 to 2023 | San Francisco

Completed an intensive full-stack software engineering program.
