

Adam Pangelinan

SOFTWARE ENGINEER | AGENT SYSTEMS, DEVELOPER TOOLS, PRODUCT RELIABILITY

adamtpang@gmail.com | +60 19 798 1734 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Forest City, Johor, Malaysia | US citizen | No US sponsorship required | Open worldwide relocation

Full-stack TypeScript engineer with 2 to 3 years of experience shipping agent products and developer tools. Builds inspectable workflows, evaluates decisions against known truth, and traces failures from React and APIs into browser and systems infrastructure.

SELECTED ENGINEERING WORK

- **summon.company | Agent reliability** | Contributed 155 personal commits to a Paperclip-derived agent-company system, including an auditable register-truth reconciler and end-to-end evaluation. The real pipeline classified 12/12 known scenarios across 5 statuses, with 0 false auto-closes in 2 security or payment cases.
- **Quantus miner | Rust and GPU debugging** | Traced a Windows wgpu OOM to 5 enumerated adapters on 2 physical GPUs: duplicate Vulkan and DX12 devices plus a CPU-emulated driver. A maintainer verified the diagnosis; review exposed the first fix's flaw and led to the corrected upstream implementation.
- **Helium Harness | Python browser developer tool** | Adapted browser-use/browser-harness into a public Helium-specific CDP derivative. Added Windows executable and profile discovery, Helium-first launch behavior, packaging, docs, and tests; the full local suite passed 141 tests with 2 platform skips.
- **skill.supply | Full-stack agent product** | Built and deployed a Next.js 16 career agent from an empty repository in under 2 weeks, with structured Anthropic outputs, Zod validation, streamed state, and live inventory from 4 ATS APIs plus 6 aggregators.

EXPERIENCE

Anchor Marianas | Founder and Software Engineer | Oct 2024 to present | Remote

Sold and delivered software directly to clients, including Hilton, owning work from discovery through implementation and production handoff.

EIGN | Software Engineer and B2B Sales | One-month trial, ended Dec 2025 | Remote

Built Lightmark.app's evidence-backed website diagnostic and worked across engineering, technical discovery, product demos, and outbound sales.

Guam Power Authority | Workflow Automation | 2024 | Guam

Automated a legacy Excel workflow from approximately 2 hours per run to approximately 2 minutes.

SKILLS

Product engineering: TypeScript, JavaScript, React, Next.js, Node.js, REST APIs, Zod, Python, Go

Agents and systems: structured outputs, tool use, evaluations, human review, browser automation, CDP, Rust and wgpu debugging

Quality: Playwright, Vitest, pytest, API testing, accessibility, performance, documentation

EDUCATION

App Academy | Full-Stack Web Development | 2022 to 2023 | San Francisco

Completed an intensive full-stack software engineering program.
