SELECTED ENGINEERING WORK

- **skill.supply | Deployed agent product** | Built and deployed a Next.js 16 product from an empty repository in under two weeks, with structured Anthropic outputs, Zod validation, streamed run state, and live job inventory from 4 ATS APIs plus 6 aggregators.
- **Register-truth evaluation | Agent adoption boundary** | Designed 12 known-ground-truth scenarios across five statuses. The real pipeline classified 12/12 correctly with zero false auto-closes in 2 security or payment cases; a focused rerun passed 15/15 tests.
- **summon.company | Auditable agent workflows** | Added 155 personal commits to a fork of Paperclip. Shipped a register-truth reconciler, task receipts, documentation automation, and Playwright and Vitest coverage for agent-operated workflows.
- **Helium Harness | Environment integration** | Adapted browser-use/browser-harness v0.1.9 into a Helium-specific CDP derivative. Added browser discovery, Windows handling, launch behavior, packaging, documentation, and unit coverage; the full local suite passes 141 tests with 2 Windows symlink skips.
