

Adam Pangelinan

SOFTWARE ENGINEER | DEVELOPER PLATFORMS, AGENT TOOLING, PLUGINS, MCP

adamtpang@gmail.com | +60 19 798 1734 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Malaysia | US citizen | No US sponsorship required | Open to US relocation

Software engineer with 2 to 3 years of experience building developer tools and full-stack agent products. Turns ambiguous workflows into inspectable software through environment-aware integrations, API-backed product surfaces, tests, documentation, and explicit human-control boundaries.

SELECTED ENGINEERING WORK

- **Helium Harness | Public browser developer tool** | Adapted browser-use/browser-harness v0.1.9 into a Helium-specific CDP derivative. Added profile and executable discovery, Windows detection, Helium-first launch behavior, documentation, packaging, and unit coverage; the full local suite passes 141 tests with 2 Windows symlink skips.
- **skill.supply | Full-stack agent product** | Built and deployed a Next.js 16 product from an empty repository in under two weeks, with structured Anthropic outputs, Zod validation, streamed run state, and live inventory from 4 ATS APIs plus 6 aggregators.
- **summon.company | Open-source agent platform** | Added 155 personal commits to a fork of Paperclip. Shipped an auditable register-truth reconciler, task receipts, a documentation workflow, and Playwright and Vitest coverage for agent-operated systems.
- **Register-truth evaluation | Agent reliability** | Designed 12 known-ground-truth scenarios across five statuses. The real pipeline classified 12/12 correctly with zero false auto-closes in 2 security or payment cases; a focused rerun passed 15/15 tests.

EXPERIENCE

Anchor Marianas | Founder and Software Engineer | Oct 2024 to present | Remote

Sold and delivered software directly to clients, including Hilton-affiliated hospitality operators, carrying work from discovery through implementation.

EIGN | Software Engineer and B2B Sales | One-month trial, ended Dec 2025 | Remote

Built Lightmark.app's evidence-backed AI-visibility website diagnostic and worked across engineering, technical discovery, product demos, and outbound sales.

Guam Power Authority | Workflow Automation | 2024 | Guam

Automated a legacy Excel workflow from approximately 2 hours per run to approximately 2 minutes.

SKILLS

Languages: TypeScript, JavaScript, Python, Go

Developer platform: REST APIs, MCP tool design, CDP, connector integrations, packaging, documentation

Product and quality: React, Next.js, Node.js, Zod, structured outputs, evaluations, human review, Playwright, Vitest, pytest

EDUCATION

App Academy | Full-Stack Web Development | 2022 to 2023 | San Francisco

Completed an intensive full-stack software engineering program.
