

Adam Pangelinan

PRODUCT ENGINEER | SUPERVISED AI WORKFLOWS, CUSTOMER DISCOVERY, FULL-STACK

adamtpang@gmail.com | +60 19 798 1734 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Forest City, Johor, Malaysia | US citizen | No US sponsorship required | Open to Austin relocation

Product engineer and founder with 2 to 3 years of engineering experience shipping TypeScript and React products end to end. Turns ambiguous operational workflows into deployed software, supervised agent boundaries, and known-ground-truth evaluations while staying close to customer discovery and delivery.

SELECTED ENGINEERING WORK

- **skill.supply | Zero-to-one product ownership** | Built and deployed a Next.js 16 career agent from an empty repository in under two weeks, with structured Anthropic outputs, Zod validation, streamed run state, human review, and live inventory from 4 ATS APIs plus 6 aggregators.
- **summon.company | Supervised agent workflows** | Added 155 personal commits to a fork of Paperclip. Shipped a register-truth reconciler, task receipts, documentation automation, and Playwright and Vitest coverage for agent-operated workflows.
- **Register-truth evaluation | Human-control guardrails** | Designed 12 scenarios across five statuses. The real pipeline classified 12/12 correctly with zero false auto-closes in 2 security or payment cases; a focused rerun passed 15/15 tests.
- **Helium Harness | Python browser developer tooling** | Adapted browser-use/browser-harness v0.1.9 into a Helium-specific CDP derivative. Added browser discovery, Windows detection, launch behavior, documentation, packaging, and unit coverage; the full local suite passes 141 tests with 2 Windows symlink skips.

EXPERIENCE

Anchor Marianas | Founder and Software Engineer | Oct 2024 to present | Remote

Sold and delivered software directly to clients, including Hilton-affiliated hospitality operators, carrying work from discovery through implementation.

EIGN | Software Engineer and B2B Sales | One-month trial, ended Dec 2025 | Remote

Built Lightmark.app's evidence-backed AI-visibility website diagnostic and worked across engineering, technical discovery, product demos, and outbound sales.

Guam Power Authority | Workflow Automation | 2024 | Guam

Automated a legacy Excel workflow from approximately 2 hours per run to approximately 2 minutes.

SKILLS

Product engineering: TypeScript, JavaScript, React, Next.js, CSS, Node.js, Python, REST APIs, Zod

Product practice: customer discovery, workflow mapping, rapid prototyping, human-in-the-loop design, end-to-end delivery

Agent quality: structured outputs, streamed state, evaluations, human approval, Playwright, Vitest, pytest

EDUCATION

App Academy | Full-Stack Web Development | 2022 to 2023 | San Francisco

Completed an intensive full-stack software engineering program.
