

Adam Pangelinan

FULL-STACK SOFTWARE ENGINEER | CREATIVE TOOLS, AI WORKFLOWS, HUMAN CONTROL

adamtpang@gmail.com | +60 19 798 1734 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Malaysia | US citizen | No US sponsorship required | Open to US relocation

Full-stack TypeScript engineer with 2 to 3 years of experience building responsive product surfaces and inspectable AI workflows. Maintains a private music-production layer on an openDAW derivative, with bounded generation, editable MIDI, provenance, and human approval before arrangement release.

SELECTED PRODUCT AND ENGINEERING WORK

- **Strummer music factory | Private openDAW derivative** | Maintained a human-approved MCP workflow for song specs, chord-to-MIDI compilation, bounded audio previews, generation and extension, Demucs stem separation, and Ableton session scaffolding. Fresh verification passed 31/31 tests, exposed 20 tools, indexed 99 sounds and 84 song specs, and verified six generated assets.
- **Human-approved song session | Private product proof** | Built a responsive Next.js interaction that keeps arrangement work locked until a person chooses four bounded assets and approves the exact set, then releases five editable moves and a provenance receipt. ESLint, TypeScript, production build, desktop, and 390 px mobile checks passed.
- **skill.supply | Full-stack career agent** | Built and deployed a Next.js 16 product from an empty repository in under two weeks, with structured Anthropic outputs, Zod validation, streamed run state, and live inventory from 4 ATS APIs plus 6 aggregators.
- **Helium Harness | Python browser tooling** | Adapted browser-use/browser-harness v0.1.9 into a Helium-specific CDP derivative. Added profile and executable discovery, Windows detection, launch behavior, documentation, packaging, and unit coverage; the full local suite passes 141 tests with 2 Windows symlink skips.
- **Register-truth evaluation | Agent reliability** | Designed 12 known-ground-truth scenarios across five statuses. The real pipeline classified 12/12 correctly with zero false auto-closes in 2 security or payment cases; a focused rerun passed 15/15 tests.

EXPERIENCE

Anchor Marianas | Founder and Software Engineer | Oct 2024 to present | Remote

Sold and delivered software directly to clients, including Hilton-affiliated hospitality operators, carrying work from discovery through implementation.

EIGN | Software Engineer and B2B Sales | One-month trial, ended Dec 2025 | Remote

Built Lightmark.app's evidence-backed AI-visibility website diagnostic and worked across engineering, technical discovery, product demos, and outbound sales.

Guam Power Authority | Workflow Automation | 2024 | Guam

Automated a legacy Excel workflow from approximately 2 hours per run to approximately 2 minutes.

SKILLS

Product engineering: TypeScript, JavaScript, React, Next.js, CSS, Node.js, Python, REST APIs, Zod

AI and creative tooling: MCP, human approval, MIDI workflow integration, audio generation and extension orchestration, stem separation, provenance

Quality: responsive UI, accessibility, structured outputs, evaluations, Playwright, Vitest, pytest

EDUCATION

App Academy | Full-Stack Web Development | 2022 to 2023 | San Francisco

Completed an intensive full-stack software engineering program.
