

Adam Pangelinan

APPLIED AI ENGINEER | AGENT RELIABILITY, TOOLING, FULL-STACK PRODUCT

adamtpang@gmail.com | +60 19 798 1734 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Malaysia | US citizen | No US sponsorship required | Open to US relocation

Applied AI and full-stack TypeScript engineer with 2 to 3 years of experience building agent products and developer tools. Turns ambiguous workflows into inspectable systems through explicit state, known-ground-truth evaluations, environment-aware integrations, tests, observability, and human-review boundaries.

SELECTED ENGINEERING WORK

- **Register-truth evaluation | Agent reliability** | Designed 12 known-ground-truth scenarios across five states. The real pipeline classified 12/12 correctly with zero false auto-closes in 2 security or payment cases; a focused rerun passed 15/15 tests.
- **summon.company | Agent workflow substrate** | Added 155 personal commits to a fork of Paperclip. Shipped an auditable register-truth reconciler, task receipts, documentation automation, and Playwright and Vitest coverage for agent-operated workflows.
- **Helium Harness | Browser and environment tooling** | Adapted browser-use/browser-harness v0.1.9 into a Helium-specific Python and CDP derivative. Added browser and profile discovery, Windows detection, launch behavior, documentation, packaging, and unit coverage; 141 tests pass with 2 symlink skips.
- **skill.supply | Full-stack AI agent product** | Built and deployed a Next.js 16 product from an empty repository in under two weeks, with structured Anthropic outputs, Zod validation, streamed run state, explicit human review, and live inventory from 4 ATS APIs plus 6 aggregators.

EXPERIENCE

Anchor Marianas | Founder and Software Engineer | Oct 2024 to present | Remote

Sold and delivered software directly to clients, including Hilton-affiliated hospitality operators, carrying work from discovery through implementation.

EIGN | Software Engineer and B2B Sales | One-month trial, ended Dec 2025 | Remote

Built Lightmark.app's evidence-backed AI-visibility website diagnostic and worked across engineering, technical discovery, product demos, and outbound sales.

Guam Power Authority | Workflow Automation | 2024 | Guam

Automated a legacy Excel workflow from approximately 2 hours per run to approximately 2 minutes.

SKILLS

Agents and reliability: LLM APIs, structured outputs, tool use, state modeling, evaluations, human review, observability

Product engineering: TypeScript, JavaScript, React, Next.js, Node.js, Python, REST APIs, Zod

Tooling and quality: CDP, browser automation, MCP tool design, packaging, documentation, Playwright, Vitest, pytest

EDUCATION

App Academy | Full-Stack Web Development | 2022 to 2023 | San Francisco

Completed an intensive full-stack software engineering program.
