

Adam Pangelinan

BROWSER AGENT ENGINEER | TYPESCRIPT, CDP, AI TOOLING

adamtpang@gmail.com | +60 19 798 1734 | adampang.com | github.com/adamtpang | linkedin.com/in/adamtpang

Full-stack engineer with 2 to 3 years of experience shipping browser and AI agent tooling in TypeScript and Python. Builds CDP integrations, auditable workflows, evaluation systems, and developer-facing products from ambiguous idea to tested software. US citizen, available as soon as possible, and open to relocating to San Francisco.

SELECTED ENGINEERING WORK

- Helium Harness | Adapted browser-use/browser-harness into a Helium-specific CDP tool. Added Windows Helium discovery, Helium-first launch behavior, documentation, packaging, and unit coverage; a full local suite passes 141 tests with 2 Windows symlink skips.
- summon.company | Added 155 personal commits to a fork of the open-source Paperclip agent platform. Shipped a register-truth reconciler, task receipts, and Playwright and Vitest coverage that make disagreement between generated records and repository reality inspectable.
- skill.supply | Built and deployed a Next.js 16 career agent from an empty repository in under two weeks. Added structured Anthropic outputs, Zod validation, streamed run states, live job inventory across public ATS APIs, and explicit human-review boundaries.
- Register-truth evaluation | Designed 12 known-ground-truth scenarios across all five statuses. The real pipeline classified 12/12 correctly with zero false auto-closes across two security or payment cases.

EXPERIENCE

Anchor Marianas | Founder and Software Engineer | Oct 2024 to present | Remote

- Sold and delivered software directly to clients, including Hilton-affiliated hospitality operators, carrying work from discovery through implementation.

EIGN | Software Engineer and B2B Sales | One-month trial, ended Dec 2025 | Remote

- Built Lightmark.app and worked across engineering, technical discovery, product demos, and outbound sales.

Guam Power Authority | Workflow Automation | 2024 | Guam

- Automated a legacy Excel workflow from approximately two hours per run to approximately two minutes.

SKILLS

Product engineering: TypeScript, React, Next.js, Node.js, REST APIs, Python, Go

Browser agents: Chrome DevTools Protocol, Playwright, browser automation, MCP, tool use, human review

Quality: pytest, Vitest, structured outputs, evaluation, documentation, public developer tooling

EDUCATION

App Academy | Full-Stack Web Development | 2022 to 2023 | San Francisco

- Completed an intensive full-stack software engineering program.
