

Adam Pangelinan

FULL-STACK TYPESCRIPT ENGINEER | AI AGENT TOOLING

adamtpang@gmail.com | +60 19 798 1734 | adampang.com | github.com/adamtpang | linkedin.com/in/adamtpang

Full-stack engineer with 2 to 3 years of experience shipping React and TypeScript products at the boundary between AI agents and human judgment. Builds auditable workflows, evaluation tooling, and developer-facing product surfaces from ambiguous idea to production. US citizen, available as soon as possible, and open to US relocation.

SELECTED ENGINEERING WORK

- skill.supply | Built and deployed a Next.js 16 career agent from an empty repository in under two weeks. Added structured Anthropic outputs, Zod validation, streamed run states, live job inventory across public ATS APIs, and explicit human-review boundaries.
- summon.company | Added 155 personal commits to a fork of the open-source Paperclip agent platform. Shipped a register-truth reconciler, task receipts, and Playwright and Vitest coverage that make disagreement between generated records and repository reality inspectable.
- Register-truth evaluation | Designed 12 known-ground-truth scenarios across all five statuses. The real pipeline classified 12/12 correctly with zero false auto-closes across two security or payment cases.
- Trace Triage UI | Built a React and TypeScript study for grouping synthetic agent failures, comparing observed behavior with expected contracts, recording evidence, and protecting state changes behind human confirmation.

EXPERIENCE

- Anchor Marianas | Founder and Software Engineer | Oct 2024 to present | Remote
 - Sold and delivered software directly to clients, including Hilton-affiliated hospitality operators, carrying work from discovery through implementation.
- EIGN | Software Engineer and B2B Sales | One-month trial, ended Dec 2025 | Remote
 - Built Lightmark.app's evidence-backed AI-visibility website diagnostic and worked across engineering, technical discovery, product demos, and outbound sales.
- Guam Power Authority | GIS Engineer | 2024, exact months to confirm | Guam
 - Automated a legacy Excel workflow from approximately two hours per run to approximately two minutes.

SKILLS

Product engineering: TypeScript, React, Next.js, Node.js, REST APIs, Postgres, Vercel

Agent systems: Anthropic and OpenAI APIs, structured outputs, tool use, MCP, evaluation, human review

Quality: Playwright, Vitest, browser automation, Chrome DevTools Protocol, Python, Go

EDUCATION

- App Academy | Full-Stack Web Development | 2022 to 2023 | San Francisco
 - Completed an intensive full-stack software engineering program.
