

Adam Pangelinan

APPLIED AI PRODUCT ENGINEER | BROWSER AGENTS, TYPESCRIPT, QA

adamtpang@gmail.com | +60 19 798 1734 | adampang.com | github.com/adamtpang | linkedin.com/in/adamtpang

Full-stack engineer with 2 to 3 years of experience shipping browser and AI agent products in TypeScript and Python. Builds CDP integrations, customer-facing workflows, evaluation systems, and developer tools from ambiguous idea to tested software. US citizen, available as soon as possible, and open to relocating to New York City.

SELECTED ENGINEERING WORK

- Helium Harness | Adapted browser-use/browser-harness into a Helium-specific CDP tool. Added Windows Helium discovery, Helium-first launch behavior, documentation, packaging, and unit coverage; a full local suite passes 141 tests with 2 Windows symlink skips.
- skill.supply | Built and deployed a Next.js 16 career agent from an empty repository in under two weeks. Added structured Anthropic outputs, Zod validation, streamed run states, live job inventory across public ATS APIs, and explicit human-review boundaries.
- summon.company | Added 155 personal commits to a fork of the open-source Paperclip agent platform. Shipped a register-truth reconciler, task receipts, and Playwright and Vitest coverage that make disagreement between generated records and repository reality inspectable.
- Register-truth evaluation | Designed 12 known-ground-truth scenarios across all five statuses. The real pipeline classified 12/12 correctly with zero false auto-closes across two security or payment cases.

EXPERIENCE

Anchor Marianas | Founder and Software Engineer | Oct 2024 to present | Remote

- Sold and delivered software directly to clients, including Hilton-affiliated hospitality operators, carrying work from discovery through implementation.

EIGN | Software Engineer and B2B Sales | One-month trial, ended Dec 2025 | Remote

- Built Lightmark.app and worked across engineering, technical discovery, product demos, and outbound sales.

Guam Power Authority | GIS Engineer | 2024, exact months to confirm | Guam

- Automated a legacy Excel workflow from approximately two hours per run to approximately two minutes.

SKILLS

Product engineering: TypeScript, React, Next.js, Node.js, REST APIs, Python, Go

Browser agents: Chrome DevTools Protocol, Playwright, browser automation, MCP, tool use, human review

Quality and customers: pytest, Vitest, LLM evaluation, structured outputs, technical discovery, B2B sales

EDUCATION

App Academy | Full-Stack Web Development | 2022 to 2023 | San Francisco

- Completed an intensive full-stack software engineering program.
